Super Vision II

Samsung's Super Vision II Wide Dynamic Range technology produces detailed information from an image's dark areas without saturation of the bright areas.

Capture perfect images in any light.

Thanks to Samsung's new SHC-721 camera, lighting conditions are no longer a consideration when installing a surveillance system. Powerful "Super Vision" II Wide Dynamic Range technology finds the best picture conditions in any environment and automatically provides the necessary light level compensation, enabling you to produce clear, detailed images in any light.

- 1/3" Color Double Scan CCD
- Super Vision II DSP Wide Dynamic Range
- No limitation of BLC zone area
- Day & Night switching with Removable Infrared Cut Filter
